SCORPION™ TRAIL II

The new Pirelli Tyre for the latest generation of enduro street riders; increased mileage, improved wet grip with an incredible performance consistency throughout its entire lifecycle.

TREAD PATTERN

The innovative tread pattern combines the typical off road style of the Pirelli SCORPION™ Range, with the experience directly derived from Angel GT: The top Pirelli Sport Touring product.

- Aggressive Off Road look.
- Peak performance of Enduro & Sport Touring blended into one product.

BI-COMPOUND

After being the first company introducing the bicomponent solution into the enduro street segment (SCORPION™ Trail), today thanks to the new SCORPION™ Trail II we are able to offer this technology to the entire rear range.

- Large centre compound stripe to guarantee mileage and enhanced cornering performance.
- Central compound developed for higher mileage and improved wet behavior.
- Side compound for optimized balance between dry & wet performance.

1 Lateral tread pattern design developed for optimal drainage.

2 Redesigned «open rail» for better traction and drainage.

3 Improved stiffness and regular wear thanks to the new «open channel» design.

PROFILE

Directly derived from the Pirelli Angel GT, 2013 Motorrad tyre test winner. Thanks to a shorter and wider contact patch area the new profile provides:

- Increased mileage thanks to reduced and uniform tread pattern wear.
- Higher speed rating (according to the latest machines' requirements).
- Top level handling throughout the entire lifecycle.
- Better control of the bikes power / traction.

STRUCTURE

Developed to let the central and side compounds work in their optimal target application the new SCORPION™ Trail II structure offers the following main benefits:

- High performance also for heavy, fully loaded bikes.
- Improved wet performance.
- Incredible versatility (both on long journeys and twisty roads with the most adverse weather conditions).

PERSONALISATION

The new SCORPION™ Trail II has a dedicated area on the sidewall to apply a personalised label, offering a wide variety of possibilities and customisation to choose from, including fonts, colors, flags, circuits and other logos. Discover more at www.pirelli.com/personalise.
